

Universal Technical Institute, Inc.'s Concorde division launches additional dental hygiene programs in Florida and Oregon

Company continues to expand offerings aligned to industry demand

PHOENIX, April 24, 2024 /PRNewswire/ -- Concorde Career Colleges today announced the launch of two dental hygiene associate degree programs at its campuses in [Miramar, Fla.](#) and [Portland, Ore.](#), bringing the number of dental hygiene programs offered to 14 nationwide. Concorde is the healthcare education division of Universal Technical Institute, Inc., a leading workforce solutions education provider that prepares and supports workers for in-demand jobs.

"Miramar and Portland are markets where we're seeing growing demand for skilled dental hygienists, so it made sense to diversify and grow our programming at our existing campuses," said Kevin Prehn, division president of Concorde Career Colleges. "We have successful, long-standing dental assistant programs at these campuses, and expanding our program offerings allow us to deepen our partnerships with dental providers in the area."

According to the [Bureau of Labor Statistics \(BLS\)](#), employment of dental hygienists is projected to grow 7% from 2022 to 2032, faster than the average for all occupations. Locally, the demand is even higher. In [Broward County](#), where the Miramar campus is located, dental hygienists are among the 25 fastest-growing occupations, with a 12.4% projected employment growth between 2023 and 2031.¹ Likewise, in the [Portland tri-county area](#), dental hygienists have a 13.7% projected job growth between 2022 and 2032.²

Concorde's dental hygiene curriculum blends online and on ground coursework with in-person lab instruction and clinical experience to prepare students to enter the dental industry in as few as 17 months.³

The Dental Hygiene programs in Miramar and Portland received initial programmatic accreditation by the Commission on Dental Accreditation (CODA).⁴ The first cohort of classes began on April 22.

Once the first cohort of students complete their foundational coursework and are ready to apply their knowledge in a real-world setting, each campus will open their dental hygiene clinic. Under the supervision of faculty and licensed dentists, students will provide a variety of services including health screenings, x-rays, dental cleanings, bite guards, and dental sealants. The [clinics are open to the community](#), offering lost-cost preventive dental care to everyone, including uninsured or underinsured individuals.

"Concorde is deeply invested in the communities where our campuses are located. Our community dental hygiene clinics provide a wonderful opportunity for our students to give back to the community, while earning the clinical competencies they need to graduate," added Prehn.

The Miramar and Portland clinics were retrofitted into the existing campus footprints. Each location has sixteen fully equipped treatment bays that can support the training of 32 students per cohort.

Each campus plans to host an open house in the fall, which will include tours of the facility and clinic.

Concorde offers a full suite of dental programs, from the on-campus Dental Assistant diploma and Dental Hygiene associate degree programs through an online [Dental Hygiene bachelor's degree completion program](#).
